

Session 3: Make passengers for your competition boat!

Now you have finished making your actual boat, it's time to make some people to travel on it! What could they look like? How many people will there be? That's up to you!

You will need (ideas, not set in stone):

- Pipe cleaners
- Lollipop sticks
- Plastic spoons
- Play-dough/plasticine
- A method of attaching passengers to the boat (tape, glue, blu tac)
- Pens/pencils to make faces!

Instructions:

Gather your bits and pieces together, and have fun creating some little people – or even animals! Once you've made your passengers, sit them in your boat ready for their journey.

Finally, test your boat on the water to see if it really floats! How far can it sail? How much weight can it carry? See what experiments you can do with it!
